

Carbon Market Profile – Rwanda

Rwanda's updated NDC commits to reduce greenhouse gas emissions by 38% through unconditional and conditional measures in agriculture, energy, waste, and industrial processes and product use; and will drive adaptation across eight sectors: water, agriculture, and forestry, human settlement, health, transport, mining, and cross-sectional; Rwanda aims to reduce 4.6 million tCO₂e in 2030 against business as usual (BAU) emissions of 12.1 million tCO₂e in 2030. 1.9 million tCO₂e will be reduced through domestically supported measures and policies, while 2.7 million tCO₂e are subject to the provision of international support (Republic of Rwanda, 2020);
